A team player and self-starter with the ability to meet the strictest deadlines while maintaining top quality results. My career objective is to apply my technical knowledge to meet all client specifications and company standards at optimum efficiency. Work with given tools and instructions to meet any deadlines along with any duties necessary to complete the project. Stay updated with the constantly changing and latest trends in IT and development to further my knowledge and usefulness to the company.

Skills: HTML | CSS | JavaScript | React js | Node.js | Express | Npm | SQL | Python | Visual Studio Code | Github | Git | MS Office | Adobe Photoshop | Adobe Illustrator

DeVry Institute of Technology | *Degree pursued B.S. CIS* | Decatur, GA April 2011-May 2014
Art Institute of Atlanta | *Degree pursued B.A GD* | Dunwoody, GA June 2008- March 2011

Software Development Portfolio

Technologies used include Git, GitHub, JavaScript, Elephant SQL, Express, HTML5, CSS, React and Python

Smile Up | github.com/jg-2021/smile_up | github.com/jg-2021/smileUp_back

- Member of a 4-person development team constructing a web application for a non-profit organization for volunteer children. The application allows tracking of volunteers, events, and profiles for each user. I collaboratively built the backend and frontend of the project, connecting our custom database with the user-interface. We met with the client, designed the app based upon their input, used Trello and Github, held daily standups, and debugged as the team ran into roadblocks.

Git Ript | github.com/jg-2021/fitness-app

- Member of a 4-person development team building an application that allows the user to look up multiple exercises based on their focus. Users have the ability to sign in and track their progress, steps, and repetitions. The user is also able to view a video of the exercise and picture examples if necessary.

React Weather | <https://github.com/jg-2021/React-weather>

- An app that allows the user to not only view the daily weather, but also the 7-day weather. Also allows the user to customize their experience including the color or the text, background and the fonts. Uses an api to call the weather data and icon for the user based on the zip code entered.

HTGAWM | https://github.com/jg-2021/the_keating_4

- Member of a 4-person development team that created a role-playing game which allows the user choices in order to solve a problem. Player need to meet certain task and collect and use item to complete successfully. Also includes in-game games for bonuses.

Work Experience

Smartstart Auto LLC | Sales Manager October 2018-January 2021

- Manage daily functions and responsibilities of customer contact, advertisement, inventory, and maintenance of used vehicle dealership including inspecting prospective vehicles and making split second decisions on value during bid

SocialTord | Tester August 2019-August 2020

- Assisted in manual and automated test before and during deployment for quality and analysis of application to mitigate bugs and software issues.

Vonayis Technology Inc. | Web Developer September 2017-November 2020

- Contracted with a team to assist in developing applications and websites based on the customer needs and budget as well as maintenance updates, and bug fixes.

Allied Universal/Securitas | Assistant Supervisor January 2014-August 2017

U.S Army/Veteran | 25B Information Technology Specialist January 2009
